 Coimbatore, Tamil Nadu

SUMMARY

Certified **Senior Automation Engineer** with **9** years of experience in test automation, functional testing and QA strategy across web, mobile and API platforms. Specialized in Selenium, Java, TestNG, Cucumber, Playwright, Appium and REST Assured with proven expertise in framework design, CI/CD integration and Agile environments. Adept at reducing manual effort, enhancing test coverage and improving release quality. Strong communicator and collaborator with a track record of driving defect reduction, accelerating release cycles and mentoring QA teams.

EXPERIENCE

INFOSYS LIMITED

Quality Engineering Lead, Apr 2022 – Dec 2025, Project: Advanced Auto Parts, America

- Designed and implemented a comprehensive test automation framework from scratch, covering both UI and mobile platforms, which reduced manual testing efforts by 75% and significantly increased deployment confidence.
- Led automation testing for regression flows by executing 500+ test cases across web and mobile platforms, reducing customer-facing defects by 65% and increasing client satisfaction scores by 25%.
- Automated a large set of high-priority regression test cases, eliminating repetitive legacy testing and improving efficiency of test execution.
- Conducted exploratory testing for new feature releases, identifying critical edge cases that helped prevent 20+ potential production defects.

TATA CONSULTANCY SERVICES PVT. LTD

Senior QA Engineer, Nov 2020–Mar 2022, Project: Morgan Stanley, America

- Worked on automation testing flow for wallet and payment gateway, transaction workflows and edge cases, ensuring 99% transaction success rate during peak traffic periods like festive sales.
- Executed cross browser and cross device compatibility testing across 10+ browsers/device combinations, ensuring consistent user experience across all platforms.
- Performed functional testing of core banking modules including account management, loan processing, transaction workflows, validating business logic and user workflows.

- Developed and executed comprehensive test cases with detailed documentation, increasing test coverage from 60% to 90% across critical banking workflows.

Automation Tester, Jul 2019–Oct 2020, Project: International Airlines Group, Spain

- Developed end-to-end test automation suite for checkout and payment systems using Selenium, TestNG, achieving 85% test coverage.
- Performed comprehensive functional testing of airlines workflows including flight search, Journey planner, passenger select, price comparison testing 1000+ scenarios across multiple browsers and devices.
- Built real-time test reporting dashboard using Allure and integrated with Slack, providing instant visibility to 10+ stakeholders across multiple teams.
- Executed regression testing for major releases, validating 200+ critical user journeys and ensuring seamless user experience during high-traffic festive seasons.
- Mentored 3 junior QA engineers on automation best practices and code review processes, improving team productivity by 30%.

QA Engineer, Aug 2017–Jun 2019, Project: Woolworths, Australia

- Worked on multiple teams (8+) for critical testing of both web and mobile based testing and give the confidence to the client for their application during after every critical releases.
- Executed regression testing with 200+ test cases for major platform releases, validating critical user journeys across multiple browsers and devices, ensuring seamless customer experience during high-traffic events.
- Developed and automated 25+ end-to-end test cases using Selenium and Appium, reducing regression execution time from 6 hours to 2 hours and accelerating release cycles.
- Worked on functional testing of newly created modules by designing and executing detailed test cases, validating business requirements, and ensuring defect-free delivery before production release.

Manual Tester, Aug 2016–Jul 2017, Project: The Home Depot

- Designed and executed 200+ functional test cases across web and mobile applications, ensuring 85%+ requirements coverage and reducing production defects by 40%.
- Collaborated with product owners and developers to validate business workflows, uncovering critical defects during functional testing and preventing costly production issues.
- Performed functional testing of complex modules (payments, onboarding and order management), validating positive, negative and edge cases across multiple environments.
- Created reusable functional test scenarios integrated with regression suites, increasing test reusability by 50% and ensuring faster validation of core business workflows.

CERTIFICATIONS

- ISTQB
- TOSCA AS1 & AS2
- GitHub Copilot
- Prompt Engineering

KEY ACHIEVEMENTS

- **Increased test coverage** - Achieved over **80%** test automation coverage across critical application modules. Reduced regression testing time from **days to hours**, speeding up release cycles.
- **Cost & Time savings** - Reduced manual testing hours, leading to significant **cost savings** for the company. Helped meet tight deadlines without compromising on **quality**.

EMPLOYMENT HISTORY

Company Name	Designation	Duration
Infosys Limited	Technical Test Lead	25-04-2022 to Till Date
Tata Consultancy Services Pvt. Ltd	Systems Engineer	11-07-2016 to 29-03-2022

EDUCATION DETAILS

Degree	School/Organization Name	Duration
Master Of Engineering – CSE	Bannari Amman Institute Of Technology	16-06-2014 to 14-05-2016
Bachelor Of Technology – IT	SNS College Of Technology	14-06-2010 to 19-04-2014
Higher Secondary	KVK Govt B HSS	08-06-2009 to 14-05-2010
SSLC	KVK Govt B HSS	11-06-2007 to 30-05-2008
